

The O-Pen®

The first thing to check off your travel list!

TSA approved to bring on board, the **Roving Blue O-Pen** is an advanced, pen-sized water purification system. It allows you to drink water from any tap worldwide and ensures that you won't get sick from microbes in the water.

- Advanced Technology** • The O-Pen is an advanced, patented device housed in a stainless steel cartridge.
- Fast-Acting** • It will purify .5 L or 16 oz. of water in under one minute.
- Ultra Portable** • The O-Pen weighs only 1.2 oz. (30 g).
- No Waste** • Rechargeable battery w/ USB cable included.

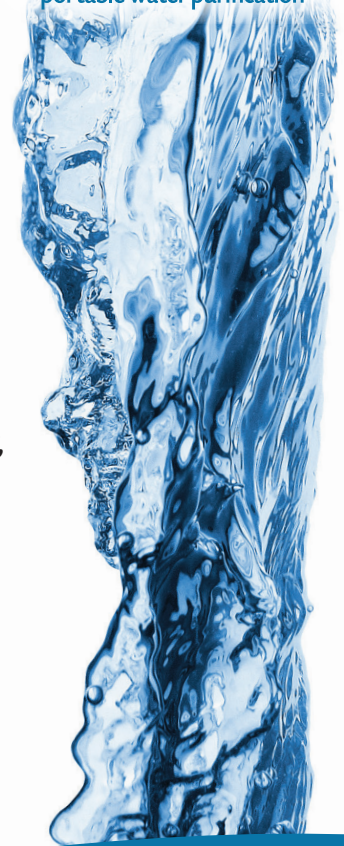

You CAN drink the water!

The O-Pen makes water safe by infusing it with tiny bubbles of ozone gas.

Approved by the FDA and the USDA for use in drinking water, ozone is more powerful than chlorine and is highly effective against bacteria, viruses, giardia, cryptosporidium, typhoid fever, coliform, dysentery, cholera, infectious jaundice, hepatitis, influenza virus, e-coli, enteric and many other dangerous microorganisms.

Ozone also removes unpleasant tastes and odors – you won't be able to tell the difference between your glass of tap water and bottled water.
