

WE FIGHT FOR YOUR HYDRATION INDEPENDENCE.

The patented Roving Blue® MVP is an advanced, ultra-light water purification system which allows soldiers to drink water from any fresh water source:
Rivers, Lakes, Streams and Storm Sewers.

MVP MODEL

Roving Blue® MVP System Features:

Turn Key System:

- Roving Blue® MVP is housed in a robust IP67 high-impact case
- Weighs less than 25 lbs. (11.8 kg)
- Output: 1 water bottle per minute
- LIPO battery pack and charger included
- Solar panels available

Smart:

- MVP can be configured to communicate with existing dismounted situational awareness and mission command systems (such as "Nett Warrior")
- User interface is easily customizable for graphics and languages
- Can have remote reporting and update capability

Decontamination Capability:

- Output water can be used to sanitize bladders, foods, surfaces, water storage tanks and more

No other system has these benefits!

CLEAN WATER SAVES LIVES

Stage 1: Dual Debris Screen

Raw water is pulled from the source; sand and dirt are excluded to 40 microns.

Stage 2: Ultrafiltration

Our P-248 certified self-purging ultrafilter excludes bacteria and viruses down to 5nm (nanometers) or 1 billionth of a meter.

Stage 3: Carbon/Silver Filtration

Antimicrobial carbon filter reduces organic contaminants.

Stage 4: Lead Reduction

Heavy metals (lead) reduction filter.

Stage 5: Ozone Chamber

Dissolved ozone improves taste, removes odors and provides downstream sanitation of hoses, water bladders, bottles or containers.
